PROFESSIONAL SUMMARY

Full Stack Software Engineer with an AI specialization, shipping production web and mobile features and building AI-powered products end-to-end. Proficient in React.js, Next.js, React Native, FastAPI, and Node.js for full-stack development, with hands-on experience integrating Retrieval-Augmented Generation (RAG) pipelines, vector databases, and Large Language Model (LLM) features into real applications. Comfortable owning work end-to-end, from backend architecture to a deployed, user-facing product.

TECHNICAL SKILLS

AI / ML: RAG Pipelines, Google Gemini, Vector Embeddings, ChromaDB, MiniLM, Whisper STT, BLIP

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS

Backend: FastAPI, Node.js, REST APIs, Python, C++

Databases & Cloud: PostgreSQL, MongoDB, MySQL, SQL Server, AWS, Docker, Vercel

PROFESSIONAL EXPERIENCE

Freelance Software Engineer — NexTek, Remote

May 2026 - Present

- Architecting and developing a multi-tenant CRM system, owning backend architecture, database design, and end-to-end feature development.
- Building core CRM workflows including omnichannel communication and document management, using a modern full-stack architecture.
- Collaborating directly with the client to translate business requirements into scalable, production-ready features.

Software Engineer — Evolisys, Karachi

Sep 2025 - Mar 2026

- Delivered end-to-end features for a multi-role service marketplace across web and mobile using React, Next.js, and React Native, shipped across multiple production releases.
- Designed and integrated RESTful backend APIs with PostgreSQL workflows, improving data consistency and reducing latency across core features.
- Collaborated in agile sprints across frontend, backend, and QA to ship high-impact features on schedule.

Web Developer Intern — PhantomCave Game Development, Karachi

Jul 2024 - Sep 2024

- Developed responsive web interfaces using HTML, CSS, and JavaScript; built Node.js backend APIs for game data management and player leaderboard features.
- Designed SQL Server schemas for player authentication and game analytics, optimizing read and write performance for high-frequency operations.

PROJECTS

Automated Domain Expert Chatbot (Final Year Project) | React, FastAPI, Google Gemini, ChromaDB, Whisper STT, BLIP

- Built a multimodal RAG assistant supporting document, voice (Whisper STT), and image (BLIP captioning) queries within a unified AI pipeline.
- Implemented semantic chunking with MiniLM embeddings and ChromaDB vector search; used Google Gemini as the generative backbone for accurate, document-grounded Q&A.
- Deployed on Hostinger VPS with per-user data isolation, MySQL persistence, and API-key-based third-party integration.

QuickReply AI — AI WhatsApp Business Assistant | Next.js 14, TypeScript, Google Gemini, Twilio, Vercel

- Built a production-ready SaaS demo of an AI WhatsApp assistant capable of answering customer questions 24/7, using a full RAG pipeline (Gemini embeddings + gemini-2.5-flash generation) for grounded responses.
- Built a live browser chat demo, an admin analytics dashboard, and real two-way Twilio WhatsApp integration.

AI Resume Reviewer | FastAPI, Google Gemini, PDF Parsing, Vercel

- Developed and deployed an AI-powered resume analysis tool that parses PDF resumes and returns structured ATS feedback, strengths/weaknesses, and job-description match scoring.
- Built with a FastAPI backend and a clean single-page UI, deployed live on Vercel.

EDUCATION

Bahria University, Karachi

Mar 2022 - Jan 2026

Bachelor of Science in Computer Science
